This year our workshop focuses on streamlining productivity for academic success. All of our funded faculty are expected to attend. Other faculty, postdocs and graduate students are also welcome. Learn about “productivity without overwhelm” and how it can benefit your research.

The session will be followed by a working lunch where participants will meet in topical research themes to network and discuss strategies for expanding communication among faculty across Vermont with similar research interests.

This year’s keynote speaker:
Porter Knight, Founding Partner, Productivity Vermont
“Since 1996, Porter Knight has been teaching people how to make decisions, take action, and accomplish what they want in life. Author of Organized to Last: 5 Simple Steps to Staying Organized, Porter is a Certified Professional Organizer and is your go-to trainer for how to be more productive in the workplace.”
